

**PRODUCT:**

## GREEN ASSASSIN Heavy Duty Concrete Cleaner

**DESCRIPTION:**

**GREEN ASSASSIN** is a biodegradable concentrated formula designed to handle removal of **SURFACE CURE R** a water borne hydrocarbon curing compound, where the normal film degradation processes (UV and weather) have not been available viz. roved situations. **GREEN ASSASSIN** can also double as an all-purpose cleaner & degreaser for such diverse surfaces as kitchen floors to diesel engines. **GREEN ASSASSIN** contains selected surfactants, water soluble solvents and alkali salts to give an all round performance in degreasing, rust staining, smoke stain removal and general cleaning.

**GENERAL DIRECTIONS****FOR USE :**

Simply wet the area and apply **GREEN ASSASSIN** using a low pressure spray, scrub with floor scrubber etc ( at 15-20m<sup>2</sup>/L) at the required dilution rate, agitating as necessary, leave for 45-60 minutes depending on the job and high pressure hose or pressure wash off.

Stripping Curing materials	1+ 3-5 parts water.
General / use	1+ 100-200 parts water.
Heavy degreasing / Engine cleaning	1+ 10 parts water.
Boat / deck wash	1 + 50 parts water.
Heavy jobs	1+ 5 parts water.

**DIRECTIONS FOR STRIPPING  
SURFACE CURE R**

Predilute Green Assassin 1+4 with water, apply over the area at a rate of 3-5m<sup>2</sup>/L. Allow to surface to soak for a minimum of 60 minutes, then scrub with a motorized scrubber using a coarse pad. Allow solution to work and check from time to time to see if film has lifted. Do not allow to dry. This process may take up to overnight, depending on the film thickness. When there is evidence of the film moving, scrub off, recover & rinse with fresh water.

**DISPOSAL:**

Disposal of residues recovered as a result of using **GREEN ASSASSIN** are biodegradable, but consider the material being removed so all residues should be removed from site and disposed via the sewage system.

**FIRST AID:**

If poisoning occurs, contact a doctor or Poisons Information Centre. If swallowed do NOT induce vomiting. Give a glass of water If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

**SAFETY DIRECTIONS:**

Avoid contact with skin and eyes and avoid breathing spray mist.

**STORAGE:**

Store away from other chemicals and food. Do not mix with other chemicals. Spills absorb with sand/soil, recover into a steel drum. Flush down area with excess water. Dispose recovered material in compliance with government regulations

**LIMITATIONS :**

Green Assassin's use for stripping curing compounds is limited by:

1. the brand. GA will not be effective on brands other than Chemical House
2. film thickness – the thicker, the more difficult it is to strip
3. actual contact time -tests have shown that the most effective method is to maximize the 'working time' of the stripper. So have found that overnight exposure followed by mechanical scrubbing works best.

**PACKS:**

Available in 20L, 200L lots.
