

FREE FORM – RELEASE AGENT

DESCRIPTION

FREE FORM is an emulsion containing a blend of natural oils, selected surfactants designed for use on steel forms as a release agent.

It is not designed as a Tilt-up Slab release.

Use Chemical House BONDBREAKER.

DIRECTIONS

Dilute Apply FREE FORM on steel formwork at a rate of 5m²/L by applying two coats, coating North-South & East-West.

Allow to dry before placing concrete in the formwork.

FREE FORM can be used on concrete surfaces, but must only be applied on a damp surface, as it will penetrate too far into the surface to be effective.

PAINTING

Residues from Free Form should be removed using high pressure water with an alkaline degreaser.

FIRST AID

For advice, contact a Poisons Information Centre (Phone Australia 131126; New Zealand 0800 764 766) or a doctor.

If swallowed, do NOT induce vomiting.

If in eyes wash out immediately with water.

If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water.

STORAGE

FREE FORM is not a dangerous good but should be kept in a cool well-ventilated place.

Store away from other chemicals and food. Do not mix with other chemicals.

PACKS

20L, 200L, 1,000L

FREE FORM - PDS August 2020

This Product Data Sheet (PDS) summarises our best knowledge of the product, including how to use and apply the product based on the information available at the time. You should read this PDS carefully and consider the information in the context of how the product will be used, including in conjunction with any other product and the type of surfaces to, and the manner in which, the product will be applied. Our responsibility for products sold is subject to our standard terms and conditions of sale. Chemical House does not accept any liability either directly or indirectly for any losses suffered in connection with the use or application of the product whether in accordance with any advice, specification, recommendation, or information given by it.
